

# TESTING ON KITE APP

## A-SANITY TESTING

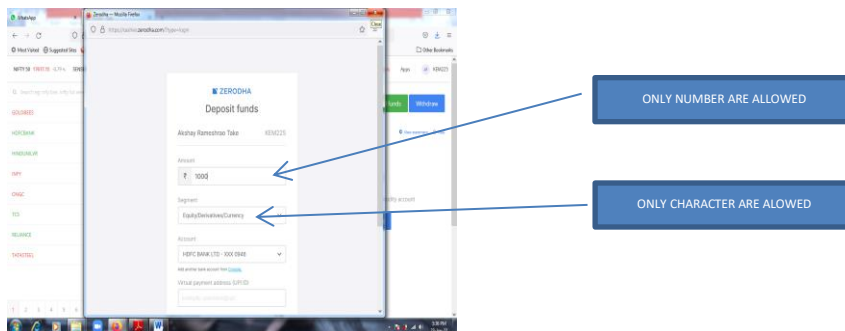

### 1-BASIC AND CORE FUNCTIONALITY VALIDATION-

We check main flow of application from start to end or page to page i.e. we check happy flow

### 2- TAB VALIDATION -

We check functionality of tab, where we enter characters, special characters, numbers, symbols & we check whether this text box is accepting it or not

### 3-LINK VALIDATION-

In this validation, sequence of interlink pages are tested

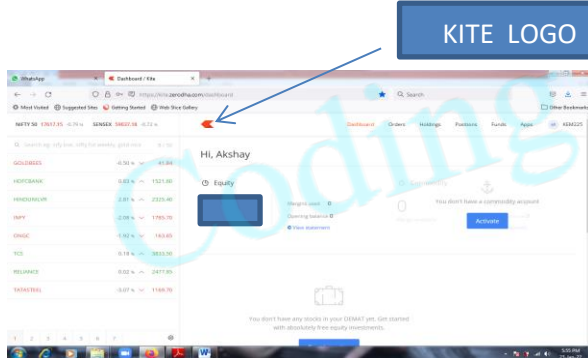

CLICK ON APP THEN APP  
INFORMATION SHOULD BE  
OPEN

### 4- PAGE VALIDATION -

We check, can we navigate from one page to other page

### 5- GRAPHICAL USER INTERFACE/UI VALIDATION
